Hw0101: a program for a user to input a hex string and print its string according to this reverse ascii encoding.

Hw0102:a program that replace strings and highlights them.

Hw0103: strtol implementation

Hw0104: multiple string functions implementation exclusive of strtok because the deadline is near and I only found out I missed this one…

Hw0105:split func and I think there is many bug and memory leak stuff…
